Preface xv
Introduction 1

*Part I: Plans for sex-role behavior*

1 **Scripts for female power** 15
From "the complete perfect unity": the Balinese 16
The creative grandmother of the primeval sea: the Semang 19
Father, mother, lover, friend: the Mbuti 21
The mother of the earth beings who fell from the sky: the Iroquois 24
One couple from the sky and one couple from the earth: the Ashanti 28
The female creative principle 33

2 **Scripts for male dominance** 35
Eve's transgression, God's punishment, and female power: the Hausa 35
The merging and splitting of animals, mothers, and males: the Mundurucu 37
Nullifying female power: the Papagoes 41
The fierce people: the Yanomamo 45
The psychological bedrock 50

*Part II: Constructing sex-role plans*

3 **The environmental context of metaphors for sexual identities** 55
Gender symbolism in creation stories: inward females and outward males 57

Male parenting and creation symbolism 60
The role of environment 64
Environment, origin beliefs, and history 68
Reflections of social life and thought in origin stories 73

**4 Plans for the sexual division of labor** 76
The kinds of activities that are universally allocated to males 77
The cultural patterning of work 79
A third cultural configuration: the dual-sex orientation 86
Sex-role plans and configurations of culture 89

**5 Blood, sex, and danger** 91
The body as symbol 92
The body in society and nature: the Andaman Islanders 97
Fluctuating food, warfare, and fear of fluxing women: the Bellacoola 100
Pollution of menstrual blood and sexual intercourse 104
Male and female worlds 108

*Part III: The women's world*

**6 The bases for female political and economic power and authority** 113
The ascribed bases for female economic and political authority 115
The case of the Abipon: female power and the hunter/warrior configuration 120
The achieved bases for female economic and political power 124
The ascribed and achieved bases for female public power and authority and increasing technological complexity 128

**7 The decline of the women's world: the effect of colonialism** 135
The Igbo women's war 136
Handsome Lake and the decline of the Iroquois matriarchate 141

Female power and movement onto the Great Plains: the Lords of the Plains and the Sacred Buffalo Hat 143
The movement of foragers into marginal territories 152
The relationship between colonialism, a marginal food base, and female power 156

*Part IV: The dynamics of male dominance and sexual inequality*

**8 The bases for male dominance** 163
Male dominance: mythical and real 163
The correlates of male dominance and sexual inequality 171
Anthropological explanations for male dominance 172
From the native's point of view 179
Male dominance: part of a cultural configuration or a solution to stress 181

**9 Why women?** 184
Defining the oppressor 185
Men, animals, and women: the Mbuti and the Desana 187
External and internal threats to social survival: mythical versus real male dominance in the New Guinea highlands 194
The experience of migration: the Azande versus the Bemba 199
Conclusion 210

*Part V: Conquerors of the land flowing with milk and honey*

**Epilogue** 215
The goddess and Yahweh cults in Canaan 216
Adam and Eve: migrating men and foreign goddesses 220
In God's image 225
The early Christians 227

*Appendixes*

A Sample 232
B Variables 236

C Analysis of the relationship between environment, fathers' proximity to infants, and origin symbolism 239
D Configurations for the division of labor 248
E Construction of the measure for female economic and political power or authority 250
F Male aggression scale and male dominance measure 253

Notes 257
Bibliography 275
Index 285

# Tables and figures

*Tables*

3.1 Geographical distribution of types of gender origin symbolism in creation stories (A05) in 112 societies *page* 59
3.2 Relationship between types of gender origin symbolism (A05) and proximity of fathers to infants (Inf 23A) 61
3.3 Relationship between types of gender origin symbolism (A05) and game hunted (Sub 05D) 66
3.4 Relationship between fathers' proximity to infants (Inf 23A) and type of game hunted (Sub 05D) 67
3.5 Gender origin symbolism (A05) and dominant mode of subsistence (Econ) 69
4.1 Average percentage of sexually integrated and segregated work activities in 156 tribal societies 81
4.2 The sexual division of labor in different subsistence economies 82
4.3 Gender origin symbolism (A05) and the sexual division of labor 85
4.4 Emphasis on competition (Coma) and the sexual division of labor 85
5.1 The number of menstrual taboos (H16) 105
5.2 Male dominance (MD) and the number of menstrual taboos (H16) 106
5.3 Warfare (War), marrying women from hostile groups (Wie), and the number of menstrual taboos (H16) 106
5.4 Scalp taking (Scal) and the number of menstrual taboos (H16) 107
5.5 Average number of sexual pollution beliefs (A11) and nature of the food supply (Sub 13) 109

6.1 Relationship between female economic and political power or authority (Stata) and type of subsistence economy (Econ) 129
6.2 Relationship between gender origin symbolism (A05) and female economic and political power or authority (Statb) in foraging and nonforaging societies 132
6.3 Relationship between migration (Mig) and female political power or authority (Statb) 133
7.1 Relationship between female economic and political power or authority (Stata) and time of description (A14) 158
7.2 Relationship between female economic and political power or authority (Stata) and nature of the food supply (Sub 13) 159
8.1 Relationship between male aggression (Msupa) and female political and economic power or authority (Stata) 165
8.2 Male dominance (MD) and sexual equality 168
8.3 Relationship between type of subsistence economy (Econ) and male dominance (MD) 170
8.4 Relationship between traits indicative of the "outer" cultural configuration and male dominance (MD) 171
8.5 Relationship between male dominance (MD), experience of migration (Mig), and nature of the food supply (Sub 13) 173
8.6 Relationship between male dominance (MD), chronic warfare (War), and food stress (Sub 14A) 174
8.7 Relationship between descent (H10), residence (H09), and male dominance (MD) 178
A.1 Geographical distribution of Standard Cross-Cultural Sample and subsample used in this study 233
A.2 Major types of subsistence economy (Econ) represented in sample 233
A.3 Number and percentage of foraging and nonforaging societies (For) 234
A.4 Range of pinpointed dates (A14) for sample societies 234
B.1 List of variables 237
C.1 Types of creative agents in 39 creation stories 241
C.2 Origin of first creator or ancestor 242

C.3 Mode of first-mentioned creation 243
C.4 Classification of gender symbolism in creation stories 245
C.5 Correlation of subsistence variables with proximity of father to infants and gender origin symbolism 246
C.6 Regression equations 247
D.1 Correlation between environmental, behavioral, and symbolic factors listed in Figure 4.1 249
E.1 Female economic and political power or authority scale (Stat) 251
E.2 Female economic and political power or authority scale (Stat) (with missing information) 252
F.1 Male aggression scale (Msup1) 254
F.2 Male aggression scale (Msup1) (with missing information) 255
F.3 Relationship between male dominance measure, female political and economic power scale, and male aggression scale 256

*Figures*

3.1 The genesis of origin symbolism *page* 68
4.1 Sexually segregated versus integrated cultural configurations 90
